

# IMPECCABLE REPUTATION IN CONSTRUCTION

RENOME EUROBUD successfully operates in construction business since 1996 and belongs to the RENOME group of companies. Our core principles are reliability, responsibility and quality.

We build commercial real estate, agricultural and social facilities, housing (residential) complexes; we also conduct reconstruction and sanitation of the buildings.

Due to our high qualification and competence, we are able to perform tasks of any complexity on time and with high quality.

RENOME EUROBUD is not only a construction business but it is a reliable source for the future of your family and business.

40+

engineering and technical staff

150+

workers

## General Contracting

Our company fully organizes work on the construction site: providing qualified workers and modern technologies, timely delivery of construction materials and optimizing project, technical and quality features and price measures.

Our responsibilities include complete control over the construction process, coordination of work implementation under the contract and subcontract agreement, necessary paperwork and commissioning on time.

## Construction and Installation

RENOME EUROBUD possesses all registration and permit documents and licenses which are required for implementation of construction and installation of any complexity.

Our company provides implementation of all work regarding construction and installation of the units on the selected area. Our range of services includes construction, home improvements, installations of internal and external engineering systems, technical equipment, excavations, interior and exterior construction works.

# Integrated Sanitation

Our company performs complex reconstruction of old and damaged buildings:

- full reconstruction of technical condition of the building and extension of the building lifespan;
- reconstruction of damaged buildings;
- implementation of energy-efficient technologies.

## Equipment and Machinery

RENOME EUROBUD uses key equipment, machinery and technologies required for performing different construction tasks. Our equipment includes tower cranes, crane trucks, excavators, bulldozers, forklifts, dump trucks, tractors, semi-trailers, plastering stations, pneumatic conveyors, scaffolds, cement (concrete) mixers, screw mixers, chainsaws and many others.

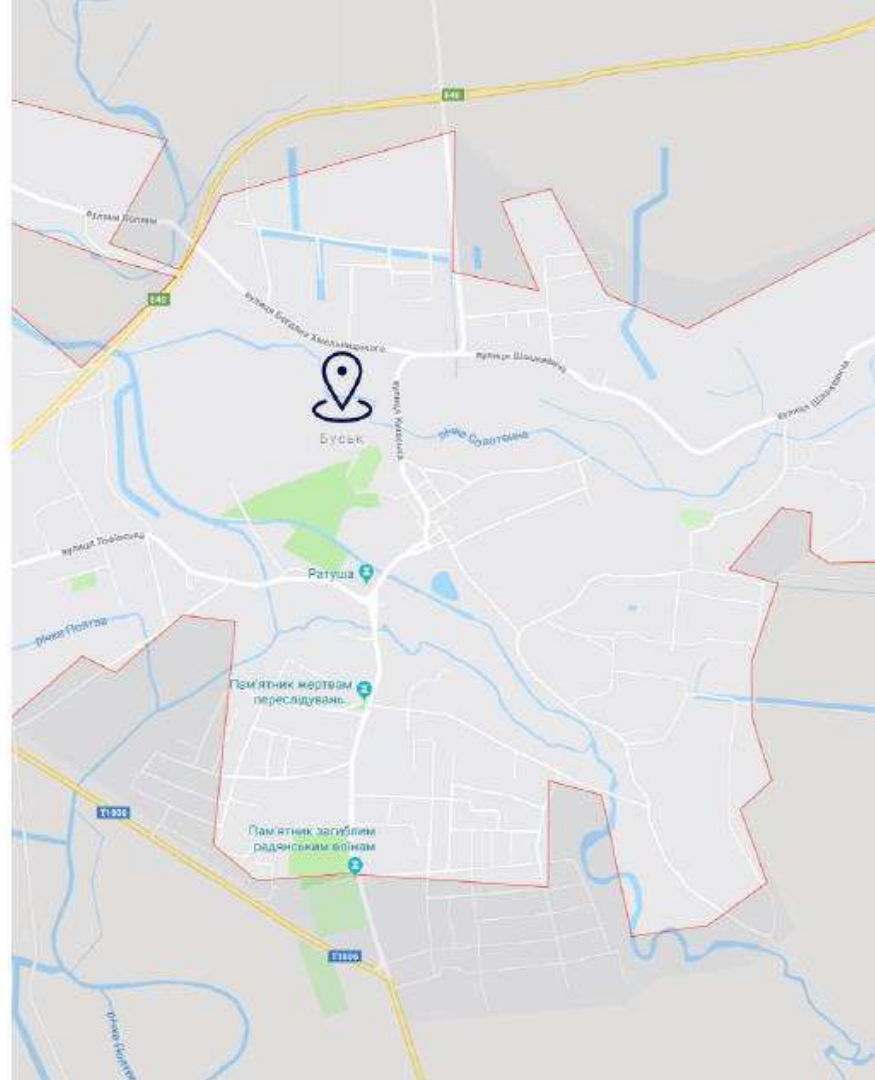

# FIDNOVA factory

RENOME EUROBUD begins the construction of the unique (in Ukraine and Europe) plant.

It is going to be powerful plant ensuring producing of animal fats and feed additives.

The plant will be located in the Busk, Lviv region. The total area of the first phase construction is 11 100m<sup>2</sup>. The plant will be equipped with ultramodern Dutch machinery. The initial capacity will be 12 000 tons of finished products per year. The total capacity of the plant will be 20 000 tons of production which will provide all suppliers in the western and part of the central Ukraine with a reliable partner.

## ODEK

Our company has a long-term cooperation with ODEK (Orzhiv woodworking plant). RENOME EUROBUD conducted construction works for the premises of ODEK: installation of new floor slabs, replacement of covering structures with sandwich-panels, installation of the supporting ring beam.

## **SPECTRUM** **residential complex**

## **360** **residential complex**

Our innovative comfort-class projects change the idea of modern residential architecture in Rivne.

RENOME EUROBUD conducted the construction of the neighborhood and residential complex “Spectrum” and apartment building “360” from scratch beginning with construction site preparation to commissioning of ready-built building.

# 80%

of all construction and installation works were conducted by RENOME EUROBUD.

# KRUPETS

## Agricultural corporation

It is a construction of industrial multisectoral agriculture buildings in Krupets' village. The land area is 55 000m<sup>2</sup>.

For this agricultural corporation RENOME EUROBUD builds the premises of the poultry factory, storage buildings with cooling equipment, premises for storage and repairing of the machinery, feed mixing plant, plant for processing sunflower seeds. The project was implemented in 2011-2018. 27 buildings were constructed.

## VOLYNGOLOVPOSTACH

The reconstruction of existing paper products factory TM “Ruta” and construction of the storage building.

During construction and installation works we used modern construction materials such as new efficient PVC-membranes coverage and polymeric floors. The façade is covered with rockwool and lined with steel. We also installed automatic fire-extinguishing and video surveillance.

## **SPACE 4**

### **Office and Sports Complex**

Construction of class-A open space buildings, sport complex with 3 swimming pools and convenient parking lot. The total area is 13 000m<sup>2</sup>.

This project includes construction using the frame type cast-in-place methods, decorating with high quality materials, the façade coverage using energy-efficient sandwich panels, roof coverage using PVC. The construction of new neighborhood in Scandinavian style using progressive architecture solutions.

---

## RENOME EUROBUD

is a company that combines reliability in construction approaches, quality, customer requirements and innovation in the implementation of bold architectural ideas. We implement large-scale and non-standard solutions and implement the best construction standards. The company has been successfully operating in the Ukrainian construction market since 1996 and has gained the reputation of a contractor who is responsibly fulfilling its responsibilities.
